Re: East Side Elementary School

To Whom It May Concern:

This letter is to serve as a reference for Ward General Contractors, Inc. Ward General Contractors completed an addition and renovation to East Side Elementary for the Cobb County School District in 2002 designed by our firm. Throughout the project, I found them to be extremely conscientious and diligent. They completed the work on time and under budget for a project that was very complex and difficult. I have found them to be responsive in matters pertaining to warranty items as well. I would recommend them to anyone.

If you would like any additional information, please feel free to call.

Sincerely,

Jerry A. Fountain, Architect  
Vice president
